

Technical Info

This show can be performed indoors or outdoors. It is suitable for all audiences.

- Creation and interpretation: Josefina Pérez Gardey
- Duration: 30 min/ 35 min in the street.
-

Technical Requirements:

The show needs a stage area of 6×6 mts. with a minimum height of three meters.

For the assembly of the structure of tightrope it must have two anchor points.

Minimum distance: 8 mts

Maximum distance: 20 mts

These may be columns, benches, trees, etc., as well as bits placed in cement, stakes into the ground; water tanks of 400 liters minimum.

Sound:

I bring a Bose system, 30 watts, a wireless microphone.

Lights:

If the show is performed indoors or at night I will require a minimum of 6 or 8 spots of 500 watts depending on the intensity of ambient light.

If it is during the day in open space, don't need lights.
